# WHAT IS FOREX TRADING?

Forex (short for foreign exchange) trading is the act of buying and selling currencies on the global market. The goal is to profit from changes in currency exchange rates.

- Market Size: Forex is the largest financial market in the world, with trillions of dollars traded daily.
- Currency Pairs: Trades happen in pairs, like EUR/USD, GBP/USD, or DEX/USD (gold priced in USD).
- Trading Hours: Forex markets operate 24 hours a day, 5 days a week.
- Leverage: Forex allows traders to use leverage, meaning you can control a large amount of currency with a smaller investment—but this also increases risk.
- Volatility: Currency prices fluctuate due to global events, interest rates, economic data, and market sentiment.
